

Science scheme of work (from September 2022)

Christian values underpinning learning: *Together we love and respect. We are creative, we are determined, we are confident, we are kind.*

Intent

The National Curriculum (2014) forms the basis for all subject teaching ensuring continuity and progression in an age-related curriculum. In addition, teachers make sure the content is relevant and stimulating by delivering through themes and topics.

Our Science curriculum has been developed to recognise the importance of Science in every aspect of daily life, and to give the teaching and learning of Science the prominence it requires. Our intent is to enable children to become enquiry-based learners by developing:

- The ability to think independently and raise questions about working scientifically and the knowledge and skills that it brings.
- The confidence and competence in the full range of practical skills, taking the initiative in, for example, planning and carrying out scientific investigations.
- Excellent scientific knowledge and understanding which is demonstrated in written and verbal explanations, solving challenging problems and reporting scientific findings.
- High levels of originality, imagination or innovation in the application of skills.
- The ability to undertake practical work in a variety of contexts, including fieldwork.
- A passion for science and its application in past, present and future technologies.
- The natural curiosity of the child, encouraging respect for living organisms and the physical environment and provide opportunities for critical evaluation of evidence.

Implementation

We ensure that all teachers and have excellent subject knowledge and leadership supports the development of this for all members of staff. Subject matter is presented clearly, teachers carefully check learning and identify misconceptions, providing direct feedback and create a positive attitude to science learning within their classrooms.

- Working Scientifically skills are embedded into lessons to ensure these skills are being developed throughout the children's school career and new vocabulary and challenging concepts are introduced through direct teaching
- Involving problem solving opportunities that allow children to find out for themselves. Children are encouraged to ask their own questions and be given opportunities to use their scientific skills and research to discover the answers.

- Children should have access to key scientific language and meanings in order to understand and readily apply these to their written, mathematical and verbal communication of their skills.
- They will use a range of resources to develop their knowledge and understanding that is integral to their learning and develop their understanding of working scientifically.
- Teaching and learning should plan for practical investigative opportunities within Science lessons.
- Children will reflect on previous learning and cross curricular links will be made wherever possible
- Children will be able to build on prior knowledge and link ideas together, enabling them to question and support them in making sense of the world around them

Year A (2023-24)

Class	Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
EYFS Oak	Materials – building homes Our bodies	Animals Habitats	Structures Melting	Changing state – eggs Mixing and separating	Minibeasts Magnifiers	Wheels Floating & sinking
Year 1 Poplar	Seasonal Changes Plants Materials	Seasonal Changes Everyday Materials	Seasonal Changes Animals including humans Plants	Seasonal Changes Science Adventures	Seasonal Changes Plants	Seasonal Changes Animals including humans
Year 2 Ash	Everyday Materials	Science Adventures	Animals including Humans	Living things and their habitats	Living things and their Habitats	Plants
Year 3/4 Beech	Rocks	Animals including humans	Light	Science Adventures	States of Matter	Plants
Year 5/6 Maple	Evolution and Inheritance	Animals including humans	Light Earth and Space	Forces Earth and Space	Animals including Humans	Electricity

Year B (2022-23)

Class	Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
EYFS Oak	Materials – building homes Our bodies	Animals Habitats	Structures Melting	Changing state – eggs Mixing and separating	Minibeasts Magnifiers	Wheels Floating & sinking
Year 1 Poplar	Seasonal Changes Plants Materials	Seasonal Changes Everyday Materials	Seasonal Changes Animals including humans Plants	Seasonal Changes Science Adventures	Seasonal Changes Plants	Seasonal Changes Animals including humans
Year 2 Ash	Everyday Materials	Science Adventures	Animals including Humans	Living things and their habitats	Living things and their Habitats	Plants
Year 3/4 Beech	Living things and their habitats	Science Adventures	Animals including Humans	Forces and Magnets	Electricity	Sound
Year 5/6 Maple	Forces and Movement	Properties and changes of materials	Properties and changes of materials	Electricity Water Cycle	Living things and their habitats	Living things and their habitats

Each Unit will be delivered using the Plan Assessment Unit Plans to support

Science Adventures is an opportunity to explore, enrich and deepen the understanding of topics studied so far. Children will explore skills in more depth to support their use across the rest of the academic year. This topic also gives the opportunity to explore and research famous scientists.

Area	EYFS	Year 1	Year 2	Year3/4	Y5/6
Science Opportunities	<p>BIOLOGY Plants Grow different plants</p> <p>Animals Name and describe animals that live in different habitats.</p> <p>Describe different habitats</p> <p>Humans Describe people who are familiar to them</p>	<p>BIOLOGY Plants Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees.</p> <p>Identify and describe the basic structure of a variety of common flowering plants, including trees.</p> <p>Animals including humans Identify and name a variety of common animals including fish, amphibians, reptiles, birds, and mammals.</p>	<p>BIOLOGY Plants Observe and describe how seeds and bulbs grow into mature plants.</p> <p>Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.</p> <p>Animals including humans Notice that animals, including humans, have offspring which grow into adults.</p> <p>Find out about and describe the basic needs of animals, including</p>	<p>BIOLOGY Plants (Y3) Observe and describe the function of parts of flowering plants, requirements of growth, transportation of water and the life cycle of plants.</p> <p>Describe water transportation in plants, life cycles and seed dispersal.</p> <p>Animals and humans (Y3) Investigate growth, basic needs, exercise, food and hygiene.</p> <p>Identify the roles of skeletons and muscles.</p> <p>Animals and humans (Y4) Investigate the basic parts of the digestive system in humans.</p> <p>Investigate different types of teeth.</p>	<p>BIOLOGY Animals and humans</p> <ul style="list-style-type: none"> Describe how water and nutrients are transported within the human body. Investigate the human circulatory system. Recognise the effect of diet, exercise and drugs. Describe and explain changes as humans develop to old age. <p>Living things and Habitats</p> <ul style="list-style-type: none"> Look at the life cycle of mammals, amphibians, insects and birds. Look at classification of plants, animals and micro-organisms. Look at reproduction in plants and animals. <p>Evolution and inheritance</p>

<p>Learn about how to take care of themselves</p> <p>Living things and their habitats Explore the plants in the surrounding natural environment</p> <p>Explore the animals in the surrounding natural environment</p> <p>Explore plants and animals in a contrasting natural environment</p> <p>CHEMISTRY Materials Explore a range of</p>	<p>Identify and name a variety of common animals that are carnivores, herbivores, and omnivores. Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets).</p> <p>Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.</p> <p>CHEMISTRY Materials Distinguish between an object and the material from which it is made.</p> <p>Identify and name a variety of everyday materials, including</p>	<p>humans, for survival (water, food, and air). Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.</p> <p>Living things and Habitats Explore and compare the differences between things that are living, dead, and things that have never been alive</p> <p>Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other</p> <p>Identify and name a variety of plants and</p>	<p>Construct and interpret food chains</p> <p>Living things and Habitats (Y4) Investigate different ways of grouping living things</p> <p>Recognise that habitats and environments change and that this can pose a danger to a species</p> <p>Use classification keys.</p> <p>CHEMISTRY Materials (Y3) Compare and group rocks and soils</p> <p>Describe how fossils are formed.</p> <p>Materials (Y4) Compare and group materials by their properties solid, liquid and gas. Investigate the changes in state of matter of a material when heated or cooled.</p> <p>Investigate evaporation and condensation in the water cycle.</p> <p>PHYSICS Light (Y3) Investigate light sources and shadows</p>	<ul style="list-style-type: none"> Recognise that fossils provide information about living things that inhabited the Earth millions of years ago Investigate how plants and animals, are adapted to suit their environment in different ways and that adaptation may lead to evolution. Recognise that plants and animals resemble their parents in many features <p>CHEMISTRY Materials</p> <ul style="list-style-type: none"> Compare and group everyday materials on the basis of their properties. Look at solubility and recovering dissolved substances. Separate mixtures. Examine changes to materials from reversible and irreversible changes. <p>PHYSICS Light</p>

Sound and hearing	Investigate different sounds and how to change the volume, sound and pitch.		Investigate different sounds and how to change the volume, sound and pitch.		Identify how sounds are made, associating some of them with something vibrating. Recognise that sounds get fainter as the distance from the sound's source increases Find patterns between the pitch of a sound and features of the object that produced it.	

					<p>Find patterns between the volume of a sound and the strength of the vibrations that produced it.</p> <p>Recognise that vibrations from sound travel through a medium to the ear.</p>	
<p>Sound and hearing vocabulary Each year group should know previous year groups as well as being introduced to the new vocabulary of their year.</p>					<p>sound sound source noise vibrate/vibration travel solid/liquid/gas pitch tune high/low volume loud/quiet fainter muffle strength of vibrations insulation instrument percussion strings brass woodwind tuned instrument</p>	

<p>Electricity</p>	<p>Identify and name common appliances that run on electricity.</p>	<p>Identify and name common appliances that run on electricity.</p>	<p>Identify and name common appliances that run on electricity.</p>		<p>Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers</p> <p>Identify whether or not a lamp will light in a simple series circuit based on whether or not the lamp is part of a complete loop with a battery.</p> <p>Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit.</p> <p>Recognise some common conductors and insulators and associate metals with being good conductors.</p>	<p>Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit.</p> <p>Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches.</p> <p>Use recognised symbols when representing a simple circuit in a diagram. (Y6)</p>

Impact

The impact and measure of this is to ensure children not only acquire the appropriate age-related knowledge linked to the science curriculum, but also skills which equip them to progress from their starting points, and within their everyday lives.

Long term:

- Children will achieve age related expectations in Science at the end of their cohort year.
- Children will retain knowledge that is pertinent to Science with a real-life context.
- Children will be able to question ideas and reflect on knowledge.
- Children will work collaboratively and practically to investigate and experiment.
- Children will be able to explain the process they have taken and be able to reason scientifically.
- Children will gain a wider variety of skills linked to both scientific knowledge and understanding, and scientific enquiry/investigative skills.

- Children will achieve a richer vocabulary which will enable to articulate their understanding of taught concepts.
- Children and teachers will have high aspirations, which will see them through to further study, work and a successful adult life.

Assessment and Monitoring in Science:

The impact of our Science curriculum is measured through the monitoring cycle in school:

- Lesson observations, book monitoring and learning walks
- Pupil voice – to check understanding, understanding of key skills and knowledge, progression, confidence in discussing Science
- Children's work shows a range of topics and evidence of the curriculum coverage for all science topics.
- Children are becoming increasingly independent in science, selecting their own tools and materials, completing pupil lead investigations and choosing their own strategies for recording.
- All children are making progress, including EAL and SEND children.

Monitoring is also used to identify gaps in the curriculum that may need to be addressed across the school, or within individual year groups. Monitoring is an ongoing cycle, which is used productively to provide the best possible Science curriculum for our children.

Role of the co-ordinator:

- Highlight / Celebrate successes
- Collate appropriate evidence over time – this should show that pupils' skills and understanding develop over time
- Monitor the standards in the subject to ensure that outcomes are at expected levels
- Provide ongoing support to colleagues
